

Stop wasting time and resources tracking employees' time manually or with solutions that aren't designed for the jobsite.

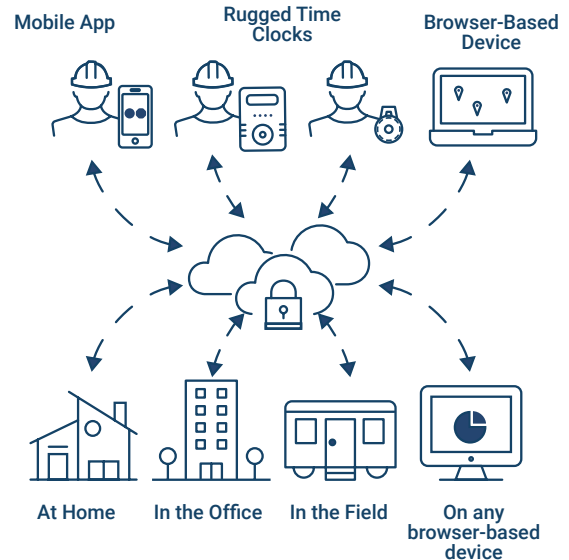

ExakTime offers a time & attendance solution that fits your needs

ExakTime's cloud-based time and attendance solution gives you the power to manage employee time records and work location, time off, job costing information and other field data easily and efficiently.

Use any browser-based device to check the status of your jobs, see who's clocked in, schedule shifts or review overtime hours and site activities. You can even manage employees' reimbursable expenses including per diem payments...and track your equipment.

Automating time-consuming, manual or inaccurate processes enables your business to stay efficient and competitive.

In the office or in the field, ExakTime solutions ensures you capture accurate hours to reduce labor costs, streamline payroll processing and help you stay compliant. We offer a feature-rich mobile app, [rugged time clocks](#) for simple and reliable onsite time keeping and kiosk mode from a laptop or other device.

“ExakTime allows us to focus on making sure everything is right instead of spending time tracking down time, job codes, and locations.”

ExakTime's time-tracking solutions offer many benefits.

Reduce Costs with Accurate Tracking

- Eliminate hour-rounding and errors with accurate digital time tracking
- Track worker locations and travel in real time with GPS functionality
- Break down project hours with customized cost code tracking
- Cut operational costs by minimizing administrative tasks

Accurate Reporting and Business Insights

- Instant reports on regular and overtime hours by location or employee for data-driven insights
- Mobile employee sign-off on rest and meal breaks and injuries during workday
- In-app employee time card review and approval with signature
- Improved time estimation for future jobs makes bidding more accurate
- Advanced analytics for customized insights

Improved Field Oversight

- View company time clocks and project information from anywhere
- Track crews and equipment from any mobile device
- Shift and task scheduling in cloud software syncs with mobile app
- Rugged, wireless clock options for all-weather conditions
- Time range editing for flexible clock in/out
- Add project notes and images
- Create custom alerts & notifications to keep crews and employees informed

Stay Compliant and Minimize Risks

- Eliminate manual time card collection errors
- Stay compliant with real-time payroll processing and syncing
- Automatic, secure cloud storage ensures FLSA compliance
- Stay compliant with employee break and injury sign-off plus digital time card approval

Payroll Integration

- Sync hours and site information with more than 90 accounting and payroll programs
- Transfer employee data to and from accounting software for significantly faster, easier payroll conditions
