

# ExakTime Mobile App

**Powerful, compliant cloud-based time & attendance tool designed for construction**

**Track labor in the field, and better manage your workforce and your jobsites.**

ExakTime's app offers powerful time tracking plus much more. Get access to features that help you communicate real-time with employees on the jobsite, get insights into your labor and job costs, track equipment and expenses, and even schedule employee shifts and time off. Save time, increase accuracy and stay compliant with labor and pay regulations with ExakTime.

## GPS precision

The software pinpoints workers' locations at clock-in and clock-out and uses your custom-set geofences to mark each timestamp as on or off-site. Our GeoTrakker feature lets you track workers as they travel, so you know where they are as long as they're on the clock.

## FaceFront photo ID verification

FaceFront uses a device's front-facing lens to snap an employee's photo as they clock in and out. Simply match these with employee master photos stored in your office computer.

## Scheduling & remote oversight

Schedule worker shifts and tasks in advance, and never wonder what's happening at a remote job site. ExakTime gives you a one-screen snapshot of any job site with a live feed of clock-in and clock-out activity, a running labor budget, field notes, equipment tracking and more.

## Field notes

This feature allows workers or supervisors in the field to record text, audio or photo updates that are sent to the cloud with one click, for review now or later.

Supply needs or purchases, equipment incidents or repairs can be easily conveyed with multimedia updates that appear instantly on the ExakTime dashboard.

## Mobile compliance

Tracking compliance with our mobile app is easy and reliable. Workers can review digital time cards and approve them with a signature. You can also prompt employees to sign off on compliance-related questions regarding meals, breaks and injuries at clock-out. Have digital proof of checking all compliance boxes.

## Powerful reporting

ExakTime includes a suite of standard reports that allow you to manage your workforce at-a-glance. Understand where employees are, what they're doing and get a better handle on labor costs. Our Advanced Analytics option lets you create and share your own custom reports.

## Manage your in-the-field workforce with an easy-to-use time tracking solution that saves you time and money

### ExakTime Mobile Benefits

- Increase the accuracy of your time tracking with a mobile, cloud-based solution
- Know when employees are at the job site and what they're doing using job codes
- See a map view of which crews are clocked in, and at what location
- Post shifts to workers' schedules, track activities and budgets as projects progress
- Review data on-the-go or at your desk via ExakTime Connect
- Collect employee time card approvals with signature on-the-go
- Transfer information easily to your accounting program
- Create and send custom messages to individual or groups of employees in the app
- Get better compliance and engagement with automatic Spanish or French translation of the app
- Make managing your time off program easier for field workers and supervisors
- iOS and Android compatible
